The future importance of bibliographic data

Sharing and control in Web 2.0

by

Patrick Danowski

Outline

- Control
- Sharing
- Remix

The Internet? Bah!

Hype Alert: Why cyberspace isn't, and will never be, nirvana

By Clifford Stoll

After two decades online, I'm perplexed. It's not that I haven't had a gas of a good time on the Internet. I've met great people and even caught a hacker or two. But today I'm uneasy about this most trendy and oversold community. Visionaries see a future of telecommuting workers, interactive libraries and multimedia classrooms. They speak of electronic town meetings and virtual communities. Commerce and business will shift from offices and malls to networks and modems.

pretense of completeness. Lacking editors, reviewers or critics, the Internet has become a wasteland of unfiltered data. You don't know what to ignore and what's worth reading. Logged onto the World Wide Web, I hunt for the date of the Battle of Trafalgar. Hundreds of files show up, and it takes 15 minutes to unravel them—one's a biography written by an eighth grader, the second is a computer game that doesn't work and the third is an image of a London monument. None answers my question, and my search is periodically interrupted by messages like, "Too many connections, try again later."

Won't the Internet be useful in governing? Internet addicts clamor for government reports, like when Andy Stein ran for county executive in Westchester

Kategorien: Mann | Indischer Wissenschaftler | Mathematiker | Bibliothekar

Results of the Cooperation

- Over 38.000 link articles
- A lot correction wishes for the PND
- Wikipedia a good starting point for a search
- Wikipedia users can very easy become library users

Other Authority Files and Wikipedia

- GKD: Institutions
  - 100 links
  - finding the ID is very hard / no retrieval webservice (now)
  - Complicated structure

Other Authority Files and Wikipedia

- SWD: Keywords
  - Already over 250 links
    - finding the ID is very hard / no retrieval webservice now
- Czech Names Authority Files
  - about 800 Links

Further Ideas

- Links from the catalog to wikipedia
- linking of other authority files
- Links from Wikipedia to other resources (via Linkresolver)

Classification of Wikipedia

- via Social Tagging = categories
- Thoughts about classification with:
  - DDC (not free!)
  - RVK (only uses in Germany)
  - Basisclassification
  - UDC (not free, too)

Vision: A free classification for the net

Wikipedia:
An Authority File for the net?

- very often linked
- One theme - one article eg. Wiki
- every wikipedia-link index an document with a theme
- article in every language has a persistent URL
- open for use in every context

Authority Files and Web 2.0

- Authority files can have a role in the web 2.0
- there must be an open interface/ service for retrieval
- everything that is indexed on the net with authority files can be easy integrated in a federated search
- O‘Reilly: You have to found ways that your data get more important that more it will be used

4. Bibliothek 2.0 Stammtisch

29 10 2007

Geschrieben von: Patrick Danowski, in Bibliothek 2.0, Veranstaltungen - Editieren

Der nächste Bibliothek 2.0 Stammtisch findet am 07.11.07 um im Via Nova, Universitätsstr. 2 (S Bhf Friedrichstr.) statt. Diesen Termin habe ich auch bei Facebook eingestellt, wer möchte kann sich gerne auch dort anmelden. Gleichzeitig findet in Berlin die Web 2.0 Expo statt. Die Vorteile und Nachteile, Chancen und Risiken von Facebook könnten auch ein Thema zum diskutieren sein.

Microformats

- web-based data formatting approach
- re-use existing content as metadata
- using XHTML and HTML classes / attributes
- human readable
- automatically processable by software

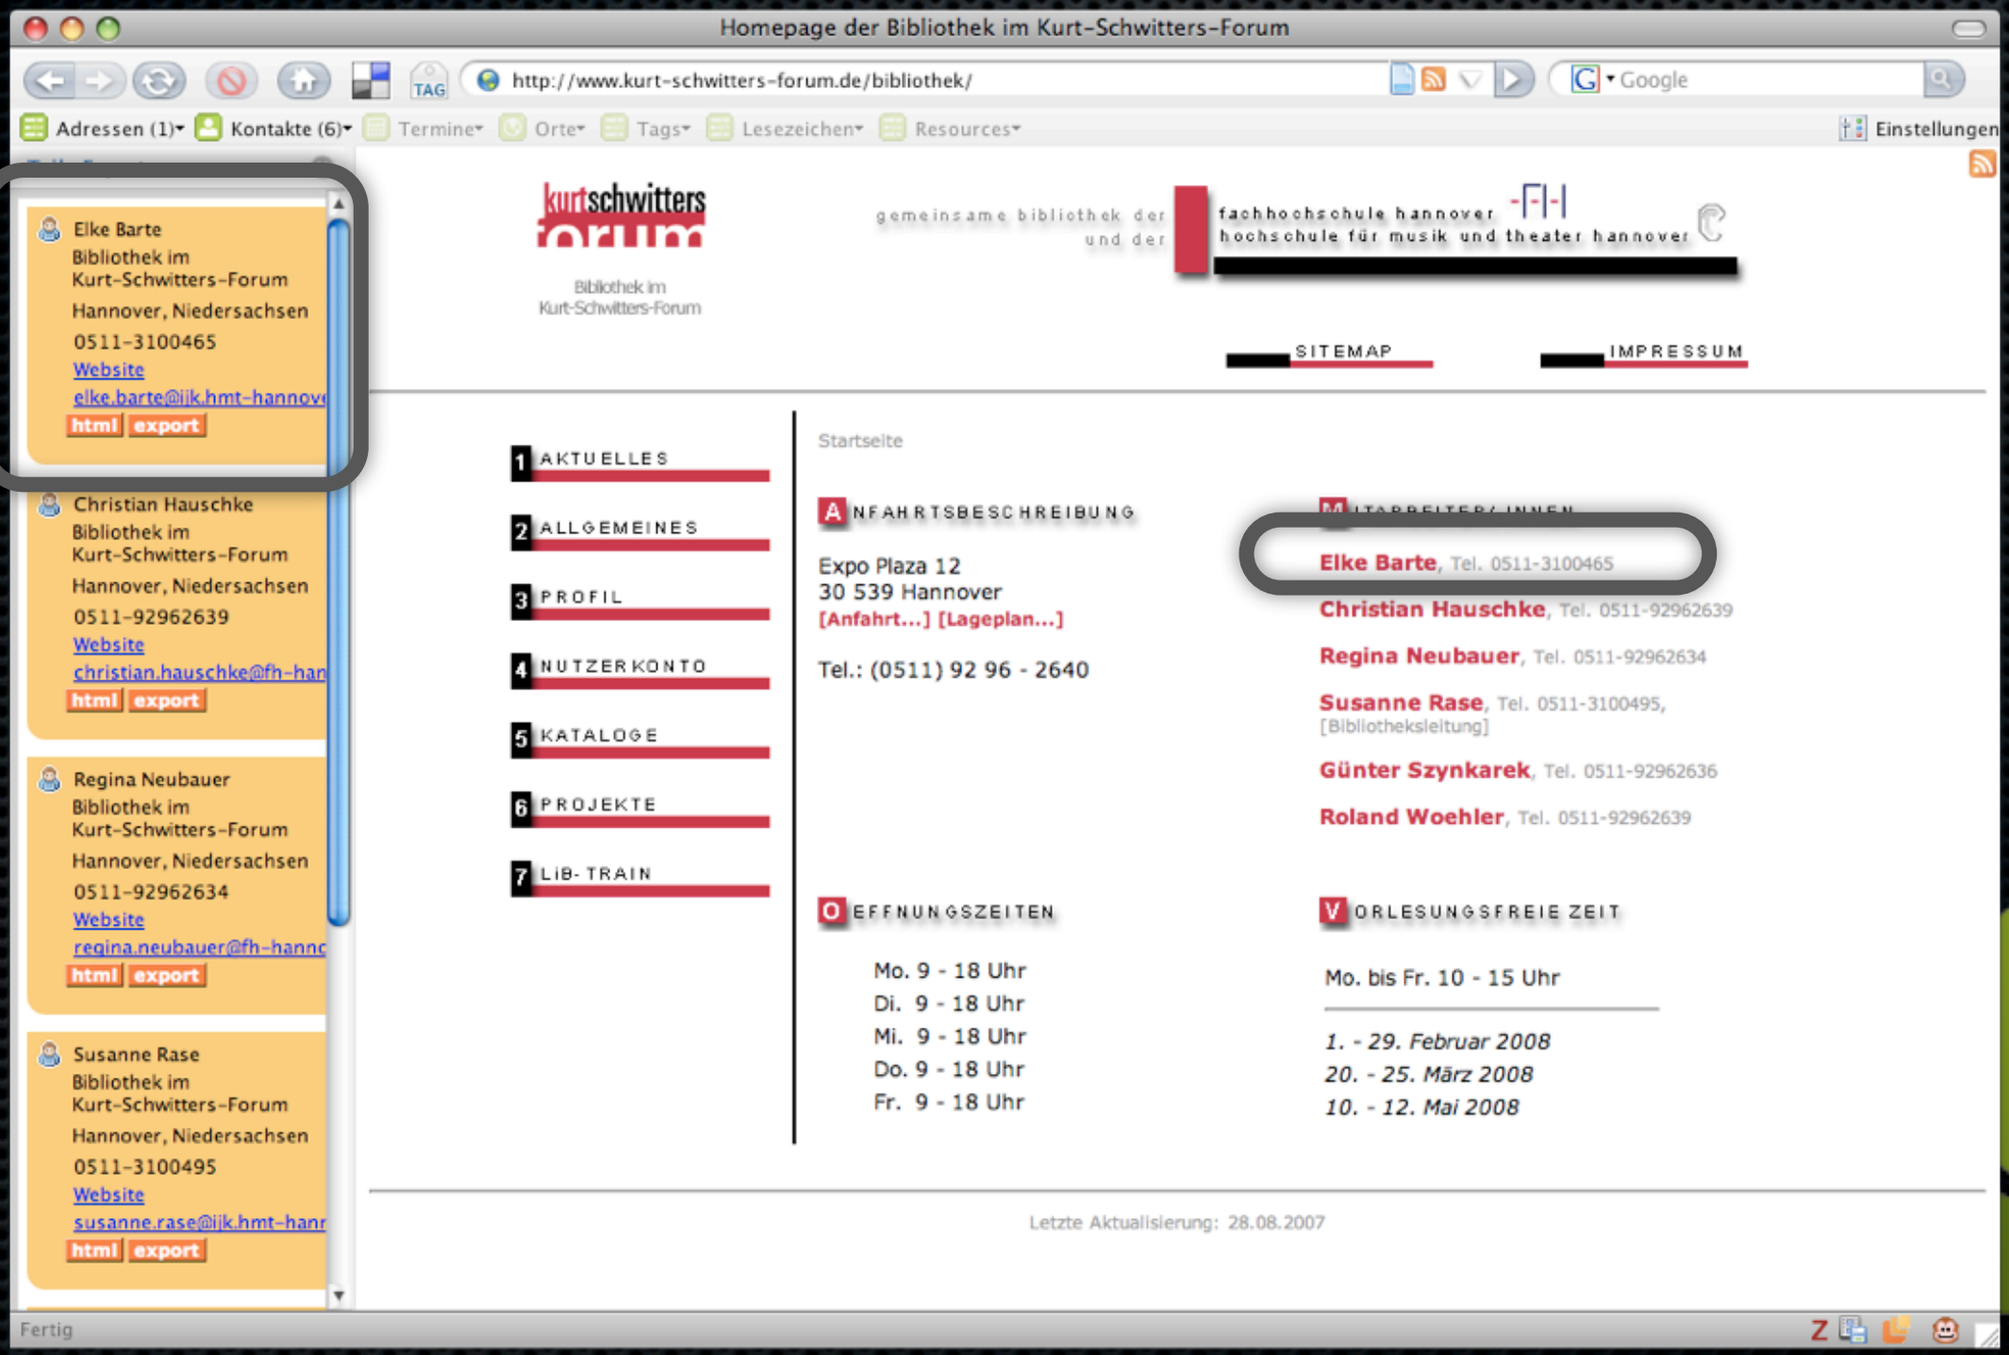
Typs of Microformats

- hCard: contacts
- hCalendar: dates
- hReview: reviews
- hResume: vitas
- XFN: social networks
- ...

Example

```
<div id="hcard-Karin-T.-Biblio" class="vcard">
<a class="url fn n" href="http://www.example.org">  <span class="given-name">Karin</span>
  <span class="additional-name">T.</span>
  <span class="family-name">Biblio</span>
</a>
<div class="org">Bibliothek 2.0</div>
<a class="email" href="mailto:karin@example.org">karin@example.org</a>
<div class="adr">
  <div class="street-address">Datenautobahn 2</div>
  <span class="locality">Infohausen</span>
  <span class="region">Wi-Wa-Wunderland</span>
  <span class="postal-code">12345</span>
</div>
<div class="tel">0815 - 987 654 321</div>
```

The user view



Citations in Microformats

- hcitation
- just a first draft
- libraries can / should participate
